youssef ben abdesslem

[Portfolio Website](#)

Full-Stack Engineer with 4+ years of experience building scalable, real-time, and data-driven systems. I enjoy tackling complex problems end-to-end, from designing multi-tenant platforms to building tools that blend software with AI in practical ways. Recently, I've been working on integrating LLMs into everyday workflows and exploring how AI can enhance decision-making

Professional Experience

Full Stack Developer

Planisphere Systems
September 2025 – Present

- Built a PowerPoint MCP server with React add-in and Python backend, integrating LLM capabilities for AI-driven slide manipulation and extended tooling.
- Developed the backend of a multi-tenant SaaS marketplace (Node.js) with tenant isolation using per-tenant database scoping, request middleware segregation, and role-based access control (RBAC).
- Implemented CI/CD pipelines, containerized backend services using Docker, and automated deployments with infrastructure-as-code practices using Docker Compose and GitHub Actions.
- Built a cross-market analysis platform for forex, crypto, and stocks with real-time data pipelines and AI models (LSTM, TFT, Random Forest, XGBoost) for pattern detection and trend forecasting.

Tech Stack: Node.js, Next.js, React, Tailwind CSS, Python, MCP, Anthropic API, Gemini API, OpenAI API, MySQL/MongoDB, Git, Docker, Github Actions

Full Stack Developer

Forvis Mazars | Tunis, Tunisia
November 2024 – May 2025

- Refined React components in the Mazars UI library, improving user experience across different internal applications.
- Developed Jest unit tests to prevent component regressions.
- Developed and maintained an audit campaign management application that automates auditor workflows, used by 500+ auditors.
- Contributed to a survey application built with SurveyJS, capable of handling 20,000+ responses per campaign, with features for targeted form distribution.
- Configured user groups and permissions in Strapi to manage access control and application capabilities.

Tech Stack: Next.js, Tailwind CSS, SurveyJS, Azure Cloud, Mazars UI, Strapi API, MySQL, GitLab, SCRUM, Jira, Jest

Frontend Web Developer

Acoba | Monastir, Tunisia
November 2022 – April 2024

- Maintained a video-on-demand (VOD) streaming and playback system serving 150,000+ concurrent users.
- Built a dashboard to manage and monitor 1,000+ cameras per user, using a modular architecture to support high API loads and ensure scalability.
- Developed reusable React components (tables, forms, wizards) to handle custom requirements
- Centralized state management using Redux Toolkit and React Context, improving data consistency across the application.
- Secured applications against known vulnerabilities including DDoS, SQL injection, and CSRF

Tech Stack: Next.js, React MUI, Tailwind CSS, Redux Toolkit, CASL, Node.js, Redis, Socket.IO, JWT, AWS, MySQL, MongoDB

Full Stack Developer
Open Eyes Consulting | Monastir, Tunisia
February 2022 – October 2022

- Developed a real-time chat module and notification system based on QuickBlocks BaaS
- Integrated Figma designs into production-ready, responsive interfaces with pixel-perfect precision.
- Optimized application performance through conditional loading and React memoization
- Enhanced search functionality using Elasticsearch fuzzy search to support partial and abbreviated creator names, improving relevance and reducing missed matches from exact search.

Tech Stack: React.js, Redux Toolkit, Redux Saga, QuickBlox, Node.js, Elasticsearch, Firebase API, MySQL, GitLab

Education

Software Engineering Degree
ISSAT Sousse, Tunisia
October 2016 – October 2021

2-year integrated preparatory program followed by 3-year Software Engineering program with specialization in Software Architecture.

Key Skills

Core Development

- Languages: TypeScript / JavaScript, Python
- Web Development: Next.js, React.js, Node.js, Flask, Fast API
- Tools & Utilities: Redux Toolkit, TanStack, Redis, Tailwind CSS

AI & Data

- LLM API Integration: Anthropic, OpenAI, Gemini
- Web Scraping: Puppeteer, Playwright
- Databases: MySQL, MongoDB, Firebase, Supabase

Cloud & Automation

- Cloud Providers: AWS, Azure
- Version Control: GitHub, GitLab
- CI/CD Tools: GitHub Actions, GitLab Pipelines
- Containerization: Docker, Docker Compose, Kubernetes
- Testing: Jest, Vitest, Pytest

Methodologies

- Scrum
- TDD

Certifications

- AWS Certified Cloud Practitioner – Validates foundational understanding of AWS cloud services and terminology

Languages

- French – Fluent
- English – Professional
- Arabic – Native
